## Summary

Experienced User experience with a demonstrated history of working in the information technology and services industry. Skilled in UI and UX design My main goal in design and design projects is to provide convenient access for users in an easier and faster way and to reduce complexity in UX, and we have created various solutions to prevent more confusion for users, as well as using new and updated ideas in Design according to the demands of customers, as well as flexibility and convenience in carrying out projects through product management and timely delivery of products to them.

## Work Experience

### Product Designer - Screenlife App

FREELANCE - Location : Tehran, Iran

May 2018

Name Project: Mobile App Design Screenlife App

#### Description I

Screenlife is a web recorder too, but it stands out from the competition because it saves its recordings as interactive video files. It means that when the user is watching the Screenlife video, all the links, buttons and other elements from the recorded pages are clickable and

#### Description II

Screenlife can be used to record tutorials, create product tours or to tell interactive stories. For example, in this Screenlife recording lifestyle blogger, Carlos Deloye Harris Jr. shares his shopping tips while creating a spring outfit on the Urban Outfitters.

#### Goals I

We needed to keep the core features as simple as possible, yet create a well-built mobile adaptation of the comprehensive recording platform.

#### Goals II

We were required to move fast, nevertheless develop a user-friendly product.

The project is currently running ●●●

to April 2022

### Product Designer - Co-design with Medical care app

FREELANCE - Location : Tehran, Iran

May 2018

Name Project: Mobile App Design IMeditation

#### Description I

The First one is "Medical care app", a service that users can check their condition and check their symptoms and disease via smartphone/PC, and if they will plan to see a doctor, they can search where clinic and doctor nearby.

#### Description II

The Second is "Medical care app", a service where outpatients can answer some medical questions via their smartphone before medical consultation, then that answer is directly sent to the doctor's dashboard.

#### Goals I

Make it more accessible to visit clinics for patients. The Patient can know possible symptoms and disease earlier via our products, and there can search clinic nearby

#### Goals II

Make it more efficient to refer from GP to Specialist care. We aim to improve medical outcomes by appropriately referring patients who are difficult to treat in GP to Specialist care to prevent "impossible to care".

The project is currently running ●●●

to April 2022

### UI/UX Designer - Product Design

FREELANCE - Location : Tehran, Iran

May 2018

Name Project: Mobile App Design

#### Description

Meditation has a lot of benefits, such as: helping to increase focus and attention, fight stress, be more creative, and so on. However, those who start meditating don't do it regularly. We wanted to understand what are the challenges around the practice of meditation that people have, and create an experience to solve those challenges.

#### Goals

My main goal in design and design projects is to provide convenient access for users in an easier and faster way and to reduce complexity in UX, and we have created various solutions to prevent more confusion for users.

The project is currently running ●●●

to April 2022

## Education

### Degree: Bachelor's in Computer Engineering - BSc.

Location: kermanshah.iran

September 2018

#### The Academic Center for Education, Culture and Research of Iran (ACECR)

4 years at Razi State University, I studied computer engineering bachelor's degree, and during that period, I focused more on remote work design, as well as on front-end and JavaScript. And I have been in direct contact with companies and indirectly with different customers and I have good communication with customers.

#### Product design and UI , UX design, as well as Chinese product management, are among my interests in design, and I have had good results for different teams in the past.

to May 2023
